

# ROYAL ENFIELD OWNER'S MANUAL

---

---

BS IV

---

---

## FOREWORD

More Power, Love and Respect. The all - new Bullet 350-KS/ES features a modern Unit Construction engine with 5 gears on the left. Easier to ride, more torque and no maintenance trouble.

This manual is designed to give you complete control over your motorcycle. It contains important information on efficient operation and maintenance. We've also included tips on riding safely, as well as suggestions to enhance your motorcycling experience.

Your safety is of prime concern to us and we urge you to be a responsible rider. Please select your riding gear carefully in accordance with your terrain, style and weather conditions. And ensure the same for your pillion rider as well. Respect the law of the land and ride safe.

Finally, we welcome you to the Royal Enfield community. You can locate your nearest club or sign up for the next big ride at [www.royalenfield.com](http://www.royalenfield.com)

The legend rides on.

## TECHNICAL SPECIFICATIONS

### CHASSIS

|             |   |
|-------------|---|
| Type .....  | Single downtube, using engine as stressed member                  |
| Frame ..... | Tubular   |
| Suspension  |   |
| Front ..... | Telescopic, 35mm forks, 130mm travel                              |
| Rear .....  | Twin shock absorbers with 5 step adjustable preload, 80mm travel. |
| Brakes      |   |
| Front ..... | 280mm Disc, 2-Piston caliper With ABS                             |
| Rear .....  | 153mm Drum, Single Lead Internal Expanding                        |
| Tyre size   |   |
| Front ..... | 3.25×19 4PR   |
| Rear .....  | 3.25×19 4/6 PR  |

### Tyre Pressure

|                       |                                |
|-----------------------|--------------------------------|
| Solo                  |                                |
| Front .....           | 20 psi/1.41 kg/cm <sup>2</sup> |
| Rear .....            | 30 psi/2.11 kg/cm <sup>2</sup> |
| With Pillion          |                                |
| Front .....           | 22 psi/1.55 kg/cm <sup>2</sup> |
| Rear .....            | 32 psi/2.25 kg/cm <sup>2</sup> |
| Steering lock .....   | In built                       |
| Fuel tank capacity .. | 13.5 litres approx. *          |
| Low fuel warning ...  | 3.5 litres approx. *           |

\* The above values are approximate and the actual fuel filling capacity will vary from the values mentioned.

### ELECTRICALS

|                         |                           |
|-------------------------|---------------------------|
| Generation .....        | Alternator                |
| System : E-Start .....  | 12V - DC (III Phase)      |
| Kick Start .....        | 12V - AC / DC (I Phase)   |
| Battery : E-Start ..... | 12V - 8 Ah MF             |
| Kick Start .....        | 12V - 5 Ah (I Phase)      |
| Head lamp .....         | 12V, HS1-35/35W (Halogen) |

## TECHNICAL SPECIFICATIONS

|                              |                     |
|------------------------------|---------------------|
| Position lamp .....          | 12V, 4W             |
| Warning Indicator lamp ..... | 12V, 1.7 W X 3 Nos. |
| Brake/Tail lamp .....        | 12V, P21/5W         |
| Parking lamp .....           | 12V, 2W X 2 Nos.    |
| Speedometer lamp .....       | 12V, 3.4W           |
| Hi beam indicator .....      | 12V, 1.7W           |
| Neutral lamp tell tale ..... | 12V, 1.7W           |
| Turn signal tell tale .....  | 12V, 1.7W           |
| Turn signal .....            | 12V, R10W X 4 Nos.  |
| Horn .....                   | 12V, 2.5 Amp (Max.) |
| Starter Motor .....          | 12V, 0.7 Kw         |

### WARNING

Using bulbs / other electrical gadgets other than specified rating may lead to over loading / erratic behaviour / premature failure of electrical system.

Modifications on the motorcycle which are not approved by Royal Enfield may not only disqualify for warranty, but also affects performance of the motorcycle.

- Values / Dimensions given above are for your guidance only.
- In view of continuous improvements being done on our products, the specifications are likely to change without prior notice.

### DIMENSIONS

|                       |                           |
|-----------------------|---------------------------|
| Length .....          | 2140 mm                   |
| Width .....           | 810 mm (Without Mirrors)  |
| Height .....          | 1120 mm (Without Mirrors) |
| Wheel base .....      | 1395 mm                   |
| Ground clearance..... | 135 mm                    |
| Saddle Height .....   | 800 mm                    |

### WEIGHTS

Kerb weight (90% fuel & oil)

|                     |                          |
|---------------------|--------------------------|
| E-Start .....       | 189 Kgs. (Bullet 350-ES) |
| Kick Start .....    | 185 Kgs. (Bullet 350)    |
| Max. Pay load ..... | 161 Kgs. (Bullet 350-ES) |
|                     | 165 Kgs. (Bullet 350)    |

## RECOMMENDED LUBRICANTS

| Engine Oil |   |
|------------|---|
| Grade      | SAE 15W 50 API SL Grade & Above<br>JASO MA2 Semi Synthetic  |
| Capacity   | 2.75 Ltrs. (First Fill only )<br>2.30 to 2.50 Ltrs. (during oil & filter<br>element replacement in periodical<br>maintenance) |

| Front Fork Oil |   | Brake Fluid                 |       |
|----------------|---|-----------------------------|-------|
| Grade          | Royal Enfield<br>Front Fork Oil<br>(or 1F Grade<br>Endurance) | Capacity:<br>Front : 100 ml |       |
| Capacity       | 195 ml/leg  | Grade                       | DOT 4 |

DO NOT Mix DOT 4 & other brake fluid together.

### CAUTION

Use of Wrong grade oil will reduce the life of the moving parts and seriously affect performance

### NOTE

Recommendation subject to change without notice.

### ISO 14001 Operation Control Process

As per the guidelines in the ISO 14001 Environmental Management System, customers are advised to carry out timely replacement of Engine, Front Fork and Brake oils, ONLY through a Royal Enfield Authorised Dealer / Service Center for the safe disposal of the used oils to prevent Environmental pollution.

In case the oils are replaced privately, it is advised to ensure the old/ removed oils are collected carefully and reached to a certified disposal agency, nearest to you to safely disposing the oils.

Similarly, hazardous wastes such as old/discarded Batteries, Tyres, Tubes, Cables, Gaskets, Oil filters etc. should also be disposed off carefully and properly only through a certified disposal agency.

---

## SAFETY DEFINITIONS

---

The information given under the titles : Warning, Caution and Note are for your safety and for the care and safety to your motorcycle and others. Please read these carefully and if disregarded may result in injury to yourself or others and damages to the motorcycle.

### **WARNING**

---

Indicates a potentially hazardous situation. Disregarding this message may result in injury to rider or other persons.

---

### **CAUTION**

---

This message if disregarded may result in damage to the motorcycle.

---

### **NOTE**

---

Indicates important and useful messages for clearer understanding.

All Images shown in subsequent pages are for reference to explain and need not to be exactly the same on the model you own.

---

## MOTORCYCLE IDENTIFICATION NUMBERS

---

---

### FRAME NUMBER

---

Punched on steering head tube right side.

---

### ENGINE NUMBER

---

Punched on crankcase left top side.

---

## LOCATION OF KEY PARTS

---

1. Horn Button
2. Turn Signal Switch
3. Clutch Lever Left
4. Head Lamp Dip Switch
5. Ignition Switch
6. Speedo Meter
7. Warning Indicator
8. Engine Kill Switch
9. Brake Lever Front
10. E-Start Switch
11. Fuel Tank Cap
12. Rear View Mirrors

---

## LOCATION OF KEY PARTS

---

1. Right Trafficator Rear
2. Air filter Box Right
3. Resonator Box
4. Carburetor
5. Pilot Lamp Right
6. Head Light
7. Number Plate Front
8. Right Trafficator Front
9. Steering lock
10. Brake Pedal
11. Kick Start Lever
12. Shockabsorber Rear

---

## LOCATION OF KEY PARTS

---

---

## OPERATION OF CONTROLS

---

### STEERING LOCK

- Turn Clockwise to lock
- Turn Anticlockwise to Unlock

### BATTERY BOX

- Turn anti clockwise to open

### FILTER / ELECTRICAL / BOXES

- Turn anti clockwise to open

### IGNITION SWITCH

- ⊗ OFF
- ON

---

## OPERATION OF CONTROLS

---

---

### FUEL TANK CAP

---

#### **OPEN**

- Turn Key Clockwise & lift the lid

#### **CLOSE**

- Gently press lid till it "click" into lock position.

---

## OPERATION OF CONTROLS

---

### FUEL TANK

---

1. Fuel Tank Mouth
2. Fuel Level Plate
3. Maximum Fuel Level

---

### **WARNING**

---

Do not overfill the fuel tank. Fill upto maximum fuel level & stop filling when the fuel reaches the bottom of Splash Arrestor.

Failure to do so will lead to canister damage Or can cause fuel spill out of fuel tank.

Petrol is highly explosive. Please ensure there are no open flames or sparks nearby while refueling and fill fuel tank only in a well ventilated area.

Please ensure petrol does not spill on painted surfaces. Wipe immediately incase fuel spills over as otherwise it will leave a permanent stain on the painted surfaces.

---

## OPERATION OF CONTROLS

---

### NOTE

- Key is common for ignition, petrol tank cap, steering lock, battery cover and tool boxes.
- Key can be removed only in locked position from fuel tank, Filter box, Electrical boxes locks in "OFF" position from Ignition switch.
- Turn handle bar to extreme left, before attempting to lock steering.

### **WARNING**

DO NOT switch OFF ignition while riding the motorcycle. Doing so can cause a potential accident, resulting in serious injury to both rider and other road users, besides causing severe damage to the motorcycle.

### **WARNING** (BULLET 350 - ES)

Turn off ignition switch when engine is not in running condition. Failure to do so will discharge the battery due to continuous head lamp ON.

---

### ENGINE STOP SWITCH

---

 Engine OFF

 Engine ON

---

### E-START SWITCH (BULLET 350 - ES)

---

 Depress & hold till engine starts

Do not press the starter button more than 5 sec. After three successive cranking, wait for 30 sec battery to recover.

---

## OPERATION OF CONTROLS

---

---

### HORN

---

 Press

---

### DAY FLASH

---

Press for Head Light Flash

---

### DIMMER SWITCH

---

 High beam

 Low beam

---

### TURN SIGNAL SWITCH

---

 Left turn signal ON

 OFF (Push to off)

 Right turn signal ON

---

## OPERATION OF CONTROLS

---

---

### CHOKE

---

ON      OFF

---

### CAUTION

---

- Choke should be used only to start engine in cold climates (less than 20°C) or first time in the morning. Riding with the Choke "ON" will result in Engine Misfiring, Erratic behaviour, High fuel consumption, and increased Emission values.

---

### FUEL TAP

---

⇓ Main ON

← OFF

⇑ Reserve ON

---

## PRE OPERATIONAL CHECKS

---

### CHECK FOR

---

1. Petrol level in the tank and leakage if any.
2. Smooth operation and free play in Front and Rear Brake levers.
3. Free play and smoothness of all operating controls.
4. Free movement of steering.
5. Any cuts, cracks in the tyre and correct tyre pressure.
6. Operation of all electrical equipments.

Front Brake

Brake Pedal

7. Brake Fluid level is above the "MIN" mark in the master cylinder.

FRONT BRAKE

8. Engine Oil Level is between "MAX & MIN" Level.

---

### NOTE

Start engine, run for 2 minutes before checking Engine Oil Level.

---

## SAFE & HAPPY RIDING

---

---

### RIDING DRESS

---

- A proper riding apparel
- Proper Riding Boots
- Soft Leather Gloves
- Goggles or spectacles
- An ISI Certified helmet. (Affix light reflecting strips of stickers on the front and rear of the helmet for good visibility at night).

---

### NOTE

---

A light coloured shirt enables greater visibility to other road users especially during nights.

---

### CAUTION

---

Loose clothing may get caught on moving parts of the motorcycle.

---

### SITTING POSTURE

---

Correct sitting posture is a must for stable and safe riding.

- Sit Straight with your shoulders completely relaxed.
- Keep your elbows close to your body.
- Hold the handle grip close to its inner end.
- Slightly grip the fuel tank with the knees.
- Keep your toes in "straight ahead" direction.
- Before turning, look extensively in the rear view mirror, without turning your head.

---

### BRAKING

---

- Use both front and rear brakes simultaneously for maximum braking efficiency.
- While riding on wet or bad road conditions use brakes cautiously.

### WARNING

---

Applying any one of the brakes suddenly may cause the motorcycle to skid.

---

## RUNNING IN PERIOD

---

The Royal Enfield Motorcycle as you would be experiencing, is capable of consistent high speeds. However as with any new motorcycle, a "RUNNING-IN" procedure is essential to help in proper "Bedding-In" of the various moving parts in your motorcycle and to achieve optimum performance subsequently.

1. During the first 2000 Kms of run, do not exceed the speed limits as shown in the table below.
2. Do not exceed maximum specified pay load.

3. Warm up the engine for a few minutes at idling speed to allow engine oil to lubricate all the moving parts in the engine before riding the motorcycle.
4. Avoid full throttle operation and do not ride at constant throttle continuously. Vary the speed by 10% while riding.
5. Avoid sudden accelerations and racing starts.

| Motorcycle<br>Gear \ Speed | First 500 kms. | 501 - 2000 kms. |
|----------------------------|----------------|-----------------|
| 1                          | 15 KMPH        | 20 KMPH         |
| 2                          | 25 KMPH        | 30 KMPH         |
| 3                          | 30 KMPH        | 40 KMPH         |
| 4                          | 45 KMPH        | 55 KMPH         |
| 5                          | 60 KMPH        | 70 KMPH         |

---

## WARNING INDICATIONS & SAFETY SYSTEMS

---

YOUR MOTORCYCLE IS FITTED WITH THE FOLLOWING WARNING INDICATIONS AND SAFETY SYSTEMS:

---

### 1. LOW FUEL INDICATION

---

The Low fuel indication in the small meter will glow if the fuel level in the fuel tank is approximately  $3.5 \pm 0.5$  Lts.

Please ensure the motorcycle is not used with the low fuel indicator lamp "ON" continuously. It may not only result in the motorcycle running out of fuel.

---

### 2. ANTI-LOCK BRAKING SYSTEM (ABS)

---

Anti-Lock Braking System (ABS) will help prevent the brakes from locking the wheels, during sudden application of the brakes at high speeds. This will help the rider to have better traction and control over the motorcycle and prevent the motorcycle from skidding which can cause an accident.

In the event of sudden and hard application of the brakes by the rider, the sensors in the braking system will signal the ABS moderator to momentarily and continuously reduce the hydraulic pressure and thereby

---

## WARNING INDICATIONS & SAFETY SYSTEMS

---

prevent the brakes from locking the wheels while reducing the speed of the vehicle. This will help the rider to control the motorcycle.

An ABS indicator lamp is provided in the console (as shown in adjacent image) to warn the rider in the event of any malfunction of the ABS.

When the ignition and kill switch are switched 'ON', the ABS sign light up and remain 'ON' till the motorcycle attains a speed of 5 Kmph (3MPH) and switch 'OFF'. This indicates the ABS is working properly. In the event the lamp does not switch 'OFF' and remains continuously 'ON' at higher speeds, it is recommended not to drive the motorcycle and get the brake system inspected and corrected through a nearest authorized Royal Enfield Distributor. Failure to do so can result in a serious injuries and loss of life.

---

### CAUTION : (ABS)

---

ABS is a safety feature to help prevent locking of wheels during sudden application of brakes. It is by no means a substitute for good riding practices and anticipatory braking.

Please ride carefully and apply brakes cautiously, especially while cornering. ABS cannot estimate the "weight shifts" and momentum of the motorcycle while negotiating a corner and therefore prevent skidding due to loss of traction.

Please anticipate the stopping distance required for the speed of travel and apply brakes well in advance so as to bring the motorcycle to a safe stop.

Please apply both brakes to stop - front brake momentarily earlier, followed by rear brake, to have better traction and control of the motorcycle

Always ensure that you ride well within the legal speed limits.

Failure to adhere to the above can cause an accident resulting in serious injuries and loss of life.

---

## WARNING INDICATIONS & SAFETY SYSTEMS

---

### DO'S & DON'T'S : (ABS)

---

| DO'S  | DON'TS  |
|---|---|
| <ul style="list-style-type: none"><li>■ While starting the engine do check the ABS indicator comes ON and switches OFF when the vehicle speed exceeds 5 km/h (3.1 mph).</li></ul>   | <ul style="list-style-type: none"><li>■ <b>DO NOT RELEASE</b> the brake lever/pedal when pulsations are felt during hard application of the brakes in an emergency situation. The pulsations only indicate that the ABS is activated.</li></ul> |
| <ul style="list-style-type: none"><li>■ Please ensure the front master cylinder brake fluid at MAX level and there is no leak in the brake system.</li></ul>  |   |
| <ul style="list-style-type: none"><li>■ Apply both the brakes simultaneously for better efficiency while braking.</li></ul>   | <ul style="list-style-type: none"><li>■ DO NOT APPLY only the front OR rear brake as it can lead to inefficient braking.</li></ul>  |
| <ul style="list-style-type: none"><li>■ In the event of the ABS indicator remaining continuously ON please take the motorcycle to a nearest authorized Royal Enfield service station to inspect the brakes system control of the vehicle.</li></ul> |   |

---

## STARTING

---

- Ensure Gear is in Neutral position and the Neutral lamp is glowing in the speedometer. To shift into neutral, move the motorcycle back and forth gently, while simultaneously shifting the gear.

### CAUTION

Do not attempt to shift gears without moving the motorcycle back and forth as it will damage the gears mechanism.

- Turn fuel tap to 'ON' "RESERVE" Position.
- Use choke if required in cold climatic conditions (below 20°C)
- Switch ON Ignition and the Stop Switch to "RUN" Position.

---

### USING THE KICK START LEVER

---

- Slowly Crank Engine with the Kickstarter lever till a resistance is felt in the lever. Slightly crank slowly and further till the compression eases over.
- Release Kickstarter lever to enable it to come to its top resting position.
- Apply a powerful swinging Kick on the lever to start the engine. It may be necessary to open the throttle, very slightly, when starting on choke/first time in the morning.
- Release Choke if applied and allow Engine to run at idling speed for a few minutes.

---

### USING ELECTRIC START

---

- Depress and Hold the Clutch Lever.
- Press Starter Button and hold till Engine starts. Do not release the button before Engine starts.

---

## GEAR SHIFTING, RIDING & STOPPING

---

### NOTE

- Release the Starter button as soon as the Engine starts.
- If Engine does not start, wait for 30 seconds before pressing the starter switch.
- A Clutch switch is provided in the system for the safety of the rider. When the motorcycle is in gear, the motorcycle cannot be started. To start in gear depress the clutch lever and press Starter button to start engine.
- Warm up engine for 2 minutes.
- Depress clutch lever.
- Press gear pedal with toe to engage 1<sup>st</sup> gear.
- Gently open throttle and release clutch lever simultaneously. If clutch is released suddenly, the engine may stall and cause the motorcycle to move with a jerk.
- To shift to 2<sup>nd</sup> and higher gears close throttle, depress clutch lever and press the gear pedal with heel.

To stop the motorcycle, close throttle, apply front and rear brakes. Simultaneously, shift gears into neutral just before the motorcycle comes to a complete stop.

- Turn the ignition switch to 'OFF' position.
- Turn fuel tap 'OFF'

---

## PARKING

---

### PARKING MOTORCYCLE ON CENTER STAND

---

- Select a firm, flat surface.
- Hold handle bar straight.
- Lower center stand, and ensure that both the legs of the stand are resting evenly on firm ground.
- Apply pressure on the fulcrum lever on the center stand and pull motorcycle backwards, gently.

### PARKING MOTORCYCLE ON SIDE STAND

---

- Select a firm, flat surface.
- Lower side stand and gently tilt motorcycle to the left till it rests firmly.

### **WARNING**

Always park the motorcycle on a firm and flat surface. Parking in a soft ground may cause stand to sink and the motorcycle to fall, causing injury to you or to others and damage to the motorcycle parts.

## PERIODICAL MAINTENANCE

The maintenance schedule detailed here will help you maintain your Bullet 350 - Kick / Electric Start Motorcycle meticulously and to get a long trouble free service. The schedule provided herein is based upon average riding conditions and indicates the Kms at which regular inspections, adjustments, replacements and lubrications are to be carried out. The frequency of the maintenance must be shortened depending upon the severity of the driving condition or if the motorcycle is used in a very dusty environment. Contact the nearest Royal Enfield Authorised Dealer / Service Center for expert advice and to carry out the required maintenance.

I : Inspect (Clean, Adjust, Lubricate or Replace if necessary)  
A : Adjust    C : Clean    L : Lubricate    R : Replace  
I/A/R: Inspect/Adjust/Replace if necessary

**NOTE**  
Check, Adjust & Lubricate frequently when riding in unusually wet, muddy, dusty roads and rainy season.

**NOTE**

For Maintenance after 50,000 Kms, Please repeat the same frequency specified above, in consultation with a Royal Enfield Authorised Dealer / Service Center.

## TOOLS & FIRST AID KIT

The tool kit is located in the left side Electrical box of the motorcycle.

| S.No. | Description                | Qty. |
|-------|----------------------------|------|
| 1.    | Tool bag                   | 1    |
| 2.    | Screw driver O6 X 160      | 1    |
| 3.    | Tommy bar with Allen key   | 1    |
| 4.    | Tubular spanner            | 1    |
| 5.    | Tool Spark plug            | 1    |
| 6.    | Double end spanner 10 X 12 | 2    |

A first aid kit is provided with the motorcycle for any emergency requirements.

| S.No. | Description                            | Qty. |
|-------|--|------|
| 1.    | Antiseptic cream 5 gms                 | 1    |
| 2.    | Wash proof plaster 1.9 cm x 7.2 cm     | 2    |
| 3.    | Gauze bandage 5 cm x 2 cm              | 1    |
| 4.    | Sterilized Gauze Swab 5 cm x 5 cm      | 2    |
| 5.    | Sterilized elastic plaster 7 cm x 6 cm | 1    |
| 6.    | Elastic Gauze bandage 8 cm x 1 mtr.    | 1    |
| 7.    | First aid kit pouch                    | 1    |

\* Please familiarise yourself with the minor maintenance of the motorcycle before attempting to carry out the same.

---

## WHEEL REMOVAL / ASSEMBLY

---

### FRONT WHEEL REMOVAL

---

- Place the motorcycle on its center stand on a firm and flat surface.
- Provide a suitable support below the front end of the engine such that the front wheel is about 4 inches (10 cms) above the ground.
- Disconnect speedo cable.
- Loosen the pinch bolt on the right side fork end.
- Hold the axle on the right side and loosen the axle nut on the left side.
- Remove the axle nut and washer.
- Tap the axle out gently from the left side and remove completely from the right side

- Slide out the wheel from the fork legs along with the speedo drive, and spacer on the left side.
- Remove the speedo drive, small spacer on the right side and stepped spacer on the left side of the wheel hub.

### CAUTION

---

Do not depress the front brake lever when wheel is removed as this will result in the brake pads coming too far out of the brake caliper.

- Place a 4 mm thick wooden piece or cardboard sheet between the brake pads to avoid pads activation in the event the front brake lever is accidentally depressed.

### FRONT WHEEL REASSEMBLY

---

- Remove the wooden piece / card board sheet placed between the brake pads.
- Locate small spacer and speedo drive over the wheel hub on the right side.

---

## WHEEL REMOVAL / ASSEMBLY

---

- Locate stepped spacer in the left side of the hub with its larger face outside.
- Locate front wheel between the fork ends duly ensuring the spacer and the speedo drive do not fall off and the brake disc is correctly positioned between the brake pads.
- Ensure the peg in the speedo drive is correctly positioned in the slot in the right side fork end.

Insert axle through the right side fork end and gently tap it in fully.

- Locate washer and nut on the left side.

- Hold the axle from the right side and tighten nut on left side to a torque of 7 KgM (70 Nm).

- Hold the pinch bolt and tighten the U-Nut on the right side fork end.

- Rotate the wheel and check for smooth rotation.
- Connect the speedo cable to speedo drive and check for proper working of speedo meter.
- Depress brake lever 2 or 3 times to check front brake efficiency.

---

## WHEEL REMOVAL / ASSEMBLY

---

### REAR WHEEL REMOVAL

---

- Place motorcycle on center stand on a firm and flat surface.
- Mark the position of the chain adjuster butting with the stopper on the Left side of the swing arm fork.
- Hold the axle firmly and remove the nut on the right side
- Pull out the axle from the left side along with the chain adjuster, taking care not to drop the wheel collar and the spacers on the left side.
- Tilt the motorcycle slightly to the right and pull out the rear wheel from the sprocket lugs.

- Slide the wheel in position between the swing arms and locate the cush rubber in the sprocket lugs correctly such that the wheel is positioned straight
- Hold the wheel collar and spacer in place between the wheel hub and the left side swing arm fork and slide the wheel axle with the chain adjuster fully and firmly through the collar, spacer and rear wheel.
- Locate the chain adjuster in the marked position against the stopper in the swing arm.
- Hold the axle firmly from the left and tighten the nut fully on the axle on the right.

---

### CAUTION

---

- Never hammer the wheel axle thro the spacer and rear wheel to prevent damage to its threads. Guide it into the wheel gently.

---

### REAR WHEEL REASSEMBLY

---

- Ensure the 4 cush rubbers are seated properly in the rear wheel hub in their locations.

---

## MINOR MAINTENANCE TIPS

---

### BRAKE FLUID

---

Check if oil is below 'MIN' level. To top Up, remove cover and diaphragm, then top up with DOT 4 as specified.

FRONT BRAKE

### CAUTION

---

Brake fluid is highly corrosive and can cause damage to painted parts. Please ensure that brake fluid does not spill on any part of the motorcycle. In the event of a spill, please clean the area immediately with a soft cloth (preferably a wet cloth) to avoid damage.

---

## MINOR MAINTENANCE TIPS

---

To adjust the free play:

- Ensure the ground is level & firm and place the motorcycle in its centre stand
- Loosen rear wheel spindle nut.
- Loosen rear sprocket stub axle nut.
- Loosen lock nuts of the chain adjuster on both ends of the swing arm.
- Tighten / loosen the adjuster nut on right swing arm end, to reduce / increase free play.
- Rotate wheel slowly and check chain free play at the top run to be between 25 - 30 mm.

- Note the matching index marks on right swing arm and chain adjuster and tighten / loosen adjuster nut on left swing arm side, to ensure the marks on both sides are at the same position.
- Tighten the lock nuts against the adjuster nuts, taking care not to disturb the adjuster nut settings.
- Tighten rear sprocket stub axle nut and wheel spindle nut to a torque of 7 Kg-m.

---

### **WARNING**

---

Chain slackness beyond 30mm will lead to chain slippage.

Maintain drive chain slackness within the specified limits at every 1000 kms interval.

Please Check the front and rear wheels are correctly aligned, after the chain adjustment.

---

## MINOR MAINTENANCE TIPS

---

### BRAKE PAD WEAR

---

- Brake pad wear depends upon the severity of usage, the type of riding and road condition.

### FRONT BRAKE

---

Check the wear indicator mark on each pad. if either pad is worn to the wear indicator mark. replace both pads as set. Visit royal enfield dealer for this service.

### REAR BRAKE PEDAL HEIGHT

---

- Loosen the lock nut.
- Turn in or out the pedal stop pin till the brake pedal and front foot rest are in the same height as shown in fig.
- Tighten the lock nut.
- Check for free rotation of rear wheel.

### REAR BRAKE

---

- Turn in or out the adjuster nut at the brake rod end.
- Recommended brake pedal free play is 20-30mm
- Check that the brake is not binding and the rear wheel rotates freely.

---

## MINOR MAINTENANCE TIPS

---

### DRIVE CHAIN TENSION (Free Play 25-30mm)

---

- Loosen axle nut, spindle nut, anchor nut and brake rod nut.
- Turn the adjuster cams on both sides, till 25 to 30 mm slackness is achieved.
- Check and ensure that the number of notches from the punch mark on the cam to the notch resting on the pin are equal on both sides.
- Apply brake and tighten all nuts.

---

## MINOR MAINTENANCE TIPS

---

The following simple maintenance activities will help in maintaining your motorcycle. However for an elaborate maintenance, we recommend you to get in touch with a Royal Enfield Authorised Dealer/Service Center.

### CONTROL CABLES

Lubricate after water washing motorcycle or if used during rainy conditions.

### HAND LEVER PIVOTS

Wipe the area free of dirt / grease.

Apply a few drops of oil on the pivots.

### CENTER/ SIDE STAND PIVOTS

Apply a few drops of oil on the pivots after cleaning the area of dirt.

### DRIVE CHAIN

Clean the drive chain carefully. Apply chain lubricant while simultaneously rotating the rear wheel. Wipe off the excess lubricant.

### OIL LEVEL INSPECTION

- Place motorcycle on its center stand on a firm surface.
- Warm up engine for a few minutes & switch off before checking oil level.
- The level is correct if the oil level is in the middle of the oil level window.
- Top up only with recommended Engine oil

### CAUTION

Use of wrong grade or spurious oil can seriously affect motorcycle performance & damage to moving parts.

## MINOR MAINTENANCE TIPS

### SPARK PLUG

#### CLEANING AND ADJUSTING PLUG GAP

- Two spark plugs are provided in your motorcycle.
- Remove the spark plug cap from the spark plug.
- Remove spark plug using the plug spanner and tommy bar.
- Clean the insulator tip and electrodes of the plug carefully.
- Check and set the electrode gap between 0.80 to 0.90 mm.

- Refit the spark plug on the cylinder head and refit the spark plug cap on the spark plug.
- Make sure the spark plug/Spark plug cap & HT cables are proper fitment.

### INSPECTION OF TYRES AND WHEELS

- Inspect the tyres periodically for tread wear, cracks and cuts.

| Minimum tread depth : |                  |
|-----------------------|------------------|
| Front tyre : 1mm      | Rear tyre : 2 mm |

- Check and remove stone, splinters, nails or other particles embedded in the tyre treads.
- Periodically inspect wheels for spokes breakage and wheel rim run out.
- Check proper seating of the tyre beading on the rim whenever the tyre is reassembled.
- Use only recommended tyres & tubes, inflated to correct air pressure.

|              | Front                            | Rear                             |
|--------------|----------------------------------|----------------------------------|
| Solo         | 1.41 kg/cm <sup>2</sup> (20 PSI) | 2.21 kg/cm <sup>2</sup> (30 PSI) |
| With Pillion | 1.55 kg/cm <sup>2</sup> (22 PSI) | 2.20kg/cm <sup>2</sup> (32 PSI)  |

---

## MINOR MAINTENANCE TIPS

---

### BATTERY & MAINTENANCE

- The motorcycle is provided with 12V - 8 Ah MF (for Bullet 350-ES) and 12V - 5 Ah (for Bullet 350)
- Periodically check the Battery for - Cleanliness and corrosion free terminals.
- For 12V 5Ah Batteries: Periodically check Electrolyte level in each cell and top up with distilled water if required.

### REMOVAL OF BATTERY FROM THE MOTORCYCLE

- The battery is located on the left side of the motorcycle near the electrical box.
- Ensure motorcycle is parked on its centerstand, in a well ventilated area.

- Ensure the ignition switch and engine stop switch are in OFF position.
- Insert the key into the battery cover lock, turn anticlockwise and hold.
- Remove the battery cover outwards while releasing the cover from the lock peg on top.
- Disconnect the -VE Terminal first and then +VE terminal.
- Remove the rubber straps and take out the battery.

### ASSEMBLY OF BATTERY ON MOTORCYCLE

- Locate the battery in the carrier.
- Secure the battery to the carrier with the rubber strap.
- Connect the +ve first and then -ve terminal to the respective cables and smear petroleum jelly on the terminals, and cover the terminals with the rubber sleeve provided on the respective cables.

---

## MINOR MAINTENANCE TIPS

---

- Position the battery cover over the lugs on top and close the cover.
- Turn the key anticlockwise and push the lock into the locator and turn the key clockwise such that the cover is locked in position.
- Release Key and remove from the lock.

---

### CAUTION

---

- Do not use battery with low charge as the battery internals will get damaged.

---

### WARNING

---

Always disconnect the negative (-) battery cable first and then the positive (+) cable while removing the battery connections. If the positive (+ve) battery cable should contact terminal with the negative (-ve) cable installed, the resulting sparks may cause a battery explosion which could result in serious injury.

---

### WARNING

---

Battery terminals and internals contain lead and lead components, known to cause cancer and birth defects or other reproductive harm. Always wear approved protective face shield, rubberized gloves, and protective clothing when working with batteries. KEEP BATTERIES AND ACID OUT OF REACH OF CHILDREN.

---

### NOTE

---

Usage of frequency for motorcycle is very important for battery to be in good performance condition. If the motorcycle is being used very rarely or sparingly and the terminals are not disconnected the battery is bound to lose its charge and result in a dead battery.

---

## MINOR MAINTENANCE TIPS

---

### Battery 12V / 8 Ah (Bullet 350 - ES)

- Your Battery is a maintenance free type and can be permanently damaged if the cap strip is removed.
- It is not necessary to check the battery electrolyte level or add distilled water as the battery is a maintenance free (Sealed type).

### For 12V 5Ah Batteries:

- Do not overfill the battery electrolyte as it will spill out through the overflow pipe and cause corrosion to motorcycle parts.

---

## CHANGING ELECTRICAL COMPONENTS

---

### HEADLAMP BULB REPLACEMENT

- Loosen the rim holding screw on top and take out the head light reflector.

- Disconnect the wiring coupler over the bulb.
- Remove the rubber grommet from the bulb.
- Press the clip by thumb to release the free end from bulb holder.
- Pull out the bulb.

---

### ASSEMBLING THE HEAD LAMP BULB

---

1. Refix the new halogen bulb into reflector unit of the headlamp.
2. Gently press the bulb holding clip and lock the free end in its slot.
3. Fit the rubber grommet.
4. Connect the electrical connections carefully & assemble the headlamp in the reverse order of dismantling.

---

## MINOR MAINTENANCE TIPS

---

### CAUTION

Never touch the bulb with your fingers, Finger prints will etch the glass and decrease bulb life. Always hold the bulb with paper or clean dry cloth during handling.

### TAIL LAMP BULB

- Remove the tail lamp cover screws and cover.
- Press bulb gently and turn anticlockwise to pull out the bulb.
- Replace bulb and assemble in the reverse order.

### TRAFFICATOR BULB

- Remove the screws & take out trafficator glass cover.
- Press bulb gently & Turn anti-clockwise to take out the bulb.
- Position the new bulb inside holder, ensuring that the pins in the bulb, match with the slots in the holder.
- Gently press the bulb and turn clockwise to lock the bulb in the holder.
- Refit the trafficator glass and screws, ensuring the lens slot / cut mark is at the bottom.

### NOTE

Make sure the Ignition switch is in OFF position when replacing the bulbs and Electrical parts.

---

## MINOR MAINTENANCE TIPS

---

### FUSE

- Open the left side Electrical box.

- The blade fuses are located in the carrier and differently coloured for identification.

### RELAY STARTER - FUSE BOX (BULLET 350 - ES)

### NOTE

Please ensure to replace a spare fuse in the holder at the earliest opportunity.

---

## MINOR MAINTENANCE TIPS

---

### HARNESS MAIN CABLE FUSE BOX (BULLET 350-ES)

---

#### NOTE

- Do not use a fuse different rating from that specified.
- Fuse SF4 (5A) provided separately in the Harness - Add on fuse box.

### BLADE FUSE USAGE LIST

| Fuse ID | Description    | Rating |
|---------|----------------|--------|
| F1      | MAIN FUSE      | 30A    |
| F2      | CHARGING FUSE  | 10A    |
| F3      | IGNITION TCI   | 10A    |
| F4      | SIGNALING FUSE | 10A    |
| F5      | Lighting       | 5A     |
| F6      | HEAD LAMP      | 10A    |
| F7      | ABS MAIN 1     | 15A    |
| F8      | ABS MAIN 2     | 10A    |
| F9      | ABS ECU        | 5A     |
| SF1     | SPARE FUSE     | 10A    |
| SF2     | SPARE FUSE     | 15A    |
| SF3     | SPARE FUSE     | 30A    |
| SF4     | SPARE FUSE     | 5A     |

---

## MINOR MAINTENANCE TIPS

---

### SPARE FUSE SF4 (BU 350 KS)

---

---

### NOTE

---

- Fuse SF4 (5A) provided separately in the Harness  
- Add on fuse box.

## MINOR MAINTENANCE TIPS

### HARNESS MAIN CABLE FUSE BOX (BU 350 ES)

#### NOTE

Do not use a fuse different rating from that specified.

### BLADE FUSE USAGE LIST

| Fuse ID | Description         | Rating |
|---------|---------------------|--------|
| F1      | CHARGING FUSE       | 25A    |
| F2      | TAIL LAMP FUSE      | 5A     |
| F3      | IGNITION FUSE (TCI) | 10A    |
| F4      | SIGNALLING FUSE     | 10A    |
| F5      | SPARE FUSE          | 5A     |
| F6      | LIGHTING FUSE       | 15A    |
| F7      | ABS MAIN 1          | 15A    |
| F8      | ABS MAIN 2          | 10A    |
| F9      | ABS IGNITION        | 5A     |
| SF1     | SPARE FUSE          | 10A    |
| SF2     | SPARE FUSE          | 15A    |
| SF3     | SPARE FUSE          | 25A    |

---

## LONG TRIP PRECAUTIONS

---

---

### Checks prior to the commencement of long journey

---

- Service the motorcycle at a Royal Enfield Authorised Dealer / Service Center.
- Ensure sufficient quantity of petrol in the fuel tank for the journey planned.
- Check and correct tyre pressure if necessary.

---

### Checks after every 1500 kms of run

---

- Any loose fasteners.
- Condition of the tyres.
- Electrolyte level in the battery..
- Correct oil level in engine.
- Working of all lights and horn.
- Proper drive chain tension.

---

### Items to be carried

---

- Tool kit
- First aid kit.
- Bulbs for headlight, trafficator light, rear tail lamp and Mini blade fuse (25, 15, 10 , 5 Amps) - (Applicable for BU 350 KS Model)
- Bulbs for headlight, trafficator light, rear tail lamp and Mini blade fuse (30, 15, 10 & 5 Amps) - (Applicable for BU 350 ES Model)
- Accelerator, Clutch and Front brake cables.
- Rear chain master link lock assembly.
- Insulation tape.
- Spark plug, Spark plug cap, Fuel hose.
- Spare tubes.

---

## WASHING PROCEDURE

---

### PRECAUTIONS

---

- Wash motorcycle when the engine is cold.
- Cover the silencer, tail pipe, carburetor, horn and control switches with suitable plastic bags and tie it firmly to prevent water entry.
- Remove ignition key and seal key hole using adhesive tape.
- Brush engine area with a solvent to remove dirt or grease.
- Use low pressure jet of water to clean.
- Never spray water with great force on head lamp, speedometer, flasher lights, front and rear wheel hubs, electrical connections and wires, control cables, carburetor, spark plug, battery etc.
- Do not apply any corrosive solvent on painted surfaces or rubber parts.
- Use luke warm water and mild detergent on the painted components to remove dirt, etc.
- Rinse motorcycle thoroughly with plain water to remove the detergent.
- If possible, use compressed air and blow off water particles from the obscure areas of the motorcycle, electrical connections etc.

- Once the motorcycle has been ridden in salty conditions or near coastal areas it is recommended to wash your motorcycle with cold water. Please do not use warm water for washing as it may damage the motorcycle due to chemical reaction with the salt. After washing process once the motorcycle is completely dry it is recommended to apply anti corrosion spray on all the metal and chrome plated areas to protect the parts from corrosion.
- It is recommended not to apply the anti-corrosion spray on the brake discs.

### AFTER WASHING

---

- Ensure, the motorcycle is thoroughly dry by wiping with a clean soft absorbent cloth or chamois leather.
- Remove all plastic bags and adhesive tapes.
- Lubricate control cables, pivot and rear chain with lube oil
- Polish the painted and plated surfaces using polishing wax.
- Start engine and allow to run at idling speed for a few minutes to warm up engine.
- Drive the motorcycle slowly, applying both brakes intermittently to dry up the water in the brake shoes.

---

## STORAGE PRECAUTIONS

---

Incase your Motorcycle is not going to be used for a month or more, the following precautions should be taken.

- Get the motorcycle service through a Royal Enfield Authorised Dealer / Service Center.
- Drain fuel tank, fuel line and carburetor.
- Keep the fuel tap in closed position and spray engine oil inside the fuel tank to prevent rusting.
- Remove spark plug. Pour in about 25ml of clean engine oil through spark plug hole. Close the hole and crank engine several times and refit spark plug.
- Clean rear chain thoroughly and apply a thin film of lub oil.
- Remove battery from the motorcycle. Clean the terminals free of corrosion and apply petroleum jelly to terminals.
- If the motorcycle is not used for a month or longer, It is advised to disconnect battery terminals and remove the battery. Before refitting the battery in the motorcycle, check the battery voltage is within specification, if not, recharge it from authorized service workshop / battery dealer.
- Store the battery in a cool, dry and well ventilated place.
- Cover the silencer with plastic bags to prevent moisture entry. Set the motorcycle on its center stand.
- Maintain electrolyte level between "max" or "min" mark, by adding distilled water and wipe the battery dry (Only for 12V 5Ah batteries).
- Apply anti rust solutions on all plated parts. Take care not to apply this solution on rubber or painted parts.
- Store motorcycle in a clean covered area free - of moisture and dust.
- For re-use after storage, it is preferable to get the motorcycle prepared through a Royal Enfield Authorised Dealer / Service Center to ensure the motorcycle is restored to its peak operating conditions.

## TROUBLE SHOOTING

We have listed below a few basic checks in case your motorcycle is not functioning. If in case the problem is not rectified after these checks, it is necessary to get the motorcycle checked by a Royal Enfield Authorised Dealer / Service Center to rectify the problem and to ensure trouble free performance.

| Symptom  | Observations  | Check for / Remedy   |
|--|---|--|
| <b>Engine Does not start</b>                   | 1. Ignition/Engine stop switch is in "OFF" position | Switch "ON" Ignition / Engine stop switch  |
|  | 2. Very low / No fuel in the fuel tank.             | Turn fuel tap to reserve position / Fill Fuel  |
|  | 3. Lights / horn very dim                           | Weak/Discharged battery. Replace Battery   |
|  | 4. Electricals not working                          | 1. Battery completely dead. Replace battery<br>2. Fuse Blown. Replace appropriate fuse.<br>Note: If fuse blows again, contact Authorised Service Center. |
|  | 5. Engine Cranking but not starting                 | Spark plug Cap/wire disconnected. Reconnect.   |
| <b>Engine Starts BUT shuts off immediately</b> | Engine shuts off as soon as throttle is closed.     | Idling RPM setting in Carburetor is disturbed. Reset the Idling RPM screw in Carburetor.   |
|  |   | Carburetor Flooded. Shut off fuel tap, gently tap Carburetor bottom and reopen fuel tap. Check if flooding has stopped.                                  |

## TROUBLE SHOOTING

| Symptom  | Observations  | Check for / Remedy   |
|--|---|--|
| <b>Engine Misfires &amp; Runs Erratically/ Stops</b> | 1. Typically happens after a Refill / Adulterated / Water in Fuel   | Drain out entire fuel and Refill with fresh fuel from a reputed filling station. |
|  | 2. Motorcycle driven in Low gear / High RPM / Crowded places for long time.   | Excessive Engine temperature. Switch OFF Engine and allow to cool down.          |
| <b>Poor Pickup</b>                                   | Engine RPM raises improporionately to motorcycle speed<br>Rear Chain excessively loose causing chain to slip on Sprocket. | Clutch is Slipping. Check for sticky clutch/ clutch not having any free play.    |
|  |   | Adjust Rear chain to correct tension.  |
| <b>ABS (Anti lock Braking system)</b>                | ABS lamp continuously ON.   | Take the vehicle to service center for diagnosis.                                |

---

## WARRANTY TERMS & CONDITIONS

---

Royal Enfield Motorcycles are manufactured by following best Quality practices in respect of the material and workmanship.

Royal Enfield (RE) warrants its motorcycle to be free from manufacturing and material defect under normal use subject to following conditions.

1. RE will replace or repair defective part(s) at their Dealerships and Authorised Service Center, free of charge within a period of 2 years / 30,000 kms from the date of sale, whichever is earlier.
2. In order to avail warranty benefits by second or subsequent owner, the second/subsequent owner should inform the nearest Royal Enfield Service Center about the purchase of the bike and shall fill in the requisite details in the form as requested by Royal Enfield.
3. The warranty shall be applicable only if all the 4 free services & 5 paid services are availed in the respective period/kilometer ranges as per the schedule in the owner's manual from RE Authorised Dealer / Service Center.
4. During the warranty period, RE's obligations shall be limited to repairing/replacing part(s) of the motorcycle for free, only if the part(s), on examination is deemed to have a manufacturing defect. Defective part(s) which have been replaced will become the sole property of RE.
5. Cost of oil, oil filter and fuel are chargeable to the customer.

---

## WARRANTY TERMS & CONDITIONS

---

6. Claims on proprietary items like tyres, tubes, spark plug, battery etc. should be taken up with the respective manufacturer or their authorised agents in the area directly by the customer. RE shall not be liable in any manner to replace them through their dealers. RE will, however, provide assistance in preferring such claims on the respective manufacturer.
7. Warranty shall not apply to:
  - (a) Normal ageing, deterioration or rusting of plated parts, paints coat, rubber parts, soft items, glass items, plastic parts etc.
  - (b) Components like fuel filter, oil filter, Air filter paper element, control cables, brake shoes / brake pads, clutch plates, drive chain & sprocket kit, Steering ball races, Electrical equipment, wiring harness etc., which are subjected to normal wear and tear.
  - (c) Failures occurred due to use of non recommended grade lubricants, fuel or improper level.
  - (d) Damages due to use of non-genuine parts, lack of proper maintenance, incorrect riding habits.
  - (e) Parts damaged due to accidents, collision, abuse etc.
  - (f) Irregularities not recognised as affecting the quality or function of the motorcycle such as slight vibration, oil leakage, discoloration of exhaust bent pipe/silencer/soft or hard shockabsorber etc.
  - (g) Defects arising from fitment of unauthorised or additional electrical loads.

---

## WARRANTY TERMS & CONDITIONS

---

- (h) Motorcycle serviced or repaired at unauthorised service centers.
  - (i) Motorcycle used for competitions / racing / Stage Rallying etc.
  - (j) Electrical component like bulbs, fuses etc. and electronic components failure including ECU due to repairs by arc welding.
  - (k) Motorcycle found with tampering / drilling / welding mark on any part of the Frame.
  - (l) Normal maintenance operations like adjustment of brakes, cleaning fuel system, engine tune-up and other such adjustments.
  - (m) Oxidization of buffed/painted/powder coated items etc.
8. RE reserves the right to finally decide on all warranty claims.
9. RE reserves the right to make changes in design of the motorcycle without any obligation to install these changes on previously supplied motorcycles.

---

## EMISSION WARRANTY

---

In compliance with the provisions of Rule 115(2) of the Central Motor Motorcycle Rules, 1989, Royal Enfield certifies that the following warranty is applicable to those components liable to affect the emission of the gaseous pollutants in its range of motorcycles, in normal use to which it may be subjected to.

This emission warranty comes into force from 01st July 2001 and is valid for a period of 30,000 Kms. or 36 months, whichever occurs earlier, from the date of sale to the first customer and is in addition to and parallel to the warranty policy, conditions and obligations laid down in the Owner's Manual.

Royal Enfield further warranty that if on examination by its Authorised Dealer / Service Center, the motorcycle fail to meet the specified emission standards, then the Authorised Dealer / Service Center shall take necessary corrective measures and shall at its sole discretion, repair or replace free of charge such components of the emission control system to meet the required emission standards.

The method/s of examination to determine the warranty conditions of the emission warranty related components will be at the sole discretion of Royal Enfield and / or our Authorised Dealer / Service Center and results of such examination will be final and binding. If on examination the warranty conditions of the part/s is/are not established, Royal Enfield will have the right to charge all, or part of the cost of such examination to the customer in addition to the cost of the components.

In case of acceptance of the component/s under Emission warranty, Royal Enfield will replace free of charge, the component/s as required. However, the consumables like fuel, lubricants, solvents, etc shall be chargeable to the customer as per actuals.

In case any of the components covered under emission warranty or the associated parts, are not independently replaceable. Royal Enfield will have the sole discretion to replace either the entire assembly or parts of the assembly, through suitable repairs.

Royal Enfield reserves the right to carry out necessary consequential repairs to the motorcycle or replace any part, in addition to the repair or replacement of the components covered under emission warranty, to establish compliance to in-use emission standards. Such repairs / replacements will be chargeable to the customer.

All parts removed for replacement under warranty will become the property of Royal Enfield.

Royal Enfield will not be responsible for the cost of transportation of the motorcycle to the nearest Authorised Dealer / Service Center OR for any loss due to non availability of the motorcycle during the period of examination and repairs by Royal Enfield and / or their Authorised Dealer / Service Center.

---

## EMISSION WARRANTY

---

Royal Enfield will not be responsible for any penalties that may be charged by statutory authorities on account of failure to comply with the in-use emission standards.

That cost/s incurred to check emission of the motorcycle will have to be borne by the customer.

Emission warranty will be applicable irrespective of the change of ownership of the motorcycle provided all the conditions as laid down in this document are met from the date of original sale of the motorcycle.

---

### THE WARRANTY SHALL APPLY IF THE CUSTOMER

---

- Observes all the important instructions and any other precautions listed in the owner's manual.
- Under all circumstances uses lubricants and fuel as recommended by Royal Enfield.
- Regularly obtains and carries out maintenance in accordance with Royal Enfield guidelines and enters the details in the Log book.
- Immediately approaches the nearest RE Authorised Dealer / Service Center upon discovery of failure to comply with the IN-USE emission standard inspite of having maintained and used the motorcycle in accordance with the instructions in the owner's manual and having carried out such repairs and adjustments as may be required with a view to establish such compliance.
- Produces the 'Pollution Under Control' certificate valid for the period immediately preceding the test during which the failure is discovered, the test having been carried out either for obtaining a new certificate or pursuant upon being directed by an officer as referred to in sub rule (2) of rule 116 of the Central Motor Vehicles Rules (CMVR).
- Produces the owner's manual and Log book for verification details.
- Produces receipts covering maintenance of the motorcycle as specified in the owner's manual from the date of original purchase of the motorcycle.
- Produces valid certificate of Insurance and R T O Registration Certificate (R.C. Book).

---

### THE EMISSION WARRANTY SHALL NOT APPLY IF

---

- A valid "Pollution under control" certificate is not produced.
- The motorcycle is not serviced by RE Authorised Dealer/Service Center as per the service schedule described in the maintenance chart.
- The motorcycle has been subjected to abnormal use, abuse, neglect and improper maintenance or has met with an accident.

---

## EMISSION WARRANTY

---

- Replacement parts not specified and approved by Royal Enfield have been used.
- The motorcycle, or parts thereof, has been altered, tampered with or modified or replaced in an unauthorised manner.
- The odometer is not functioning or the odometer and / or its reading has been changed / tampered with, so that the actual distance covered cannot be readily determined.
- The motorcycle has been used for competitions, races, and rallies or for the purpose of establishing records.
- On examination by Royal Enfield or its Authorised Dealer / Service Center, if the motorcycle shows that any of the conditions stipulated in the Owner's manual with regard to use and maintenance have been violated.
- The motorcycle has been run on adulterated / leaded fuel or lubricant other than those specified by Royal Enfield in the Owner's manual or any other document given to the customer at the time of sale of the motorcycle.
- The emission related components are tampered with.
- All service and parts related bills and vouchers incurred during the tenure of the emission warranty is not produced.
- All maintenance activities carried out on the motorcycle during the tenure of the emission warranty is not entered in the log book.

---

### TIPS TO BE ON THE RIGHT SIDE OF LAW

---

- Always get your motorcycle checked to meet the emission regulations through an authorised emission checking center.
- Always carry a valid 'Pollution Under Control' certificate with you at all times during the validity of the emission warranty (30,000 Kms / 3 years from the date of first sale)

---

### TIPS TO REDUCE POLLUTION

---

- Ensure that the periodical maintenance is carried out as stipulated in the owner's manual through a Royal Enfield Authorised Dealer / Service Center.
- Use only Unleaded petrol (> 87 octane) from reputed fuel pumps.
- Ensure the fuel used is not adulterated.
- Use correct spark plug as recommended in the owner's manual.
- Use lubricants as per recommendations given on grade / brand in the owner's manual.

---

## EVAPORATIVE EMISSION CONTROL SYSTEM WARRANTY

---

The following warranty applies to the evaporative emission control system.

Royal Enfield Motors warrants the first owner and each subsequent owner, that this motorcycle is designed and built so as to conform, at the time of sale, with applicable regulations specified by the evaporative emission control system related parts fitted to this motorcycle are free from defects in materials and workmanship which may cause this motorcycle not to meet applicable regulations period of 24 Months from the date of first use of the motorcycle.

The Warranty period shall begin either on the date the motorcycle is delivered to the first retail purchaser OR from the first date the motorcycle is used as a demonstrator OR as a display and/or trial motorcycle.

### THE FOLLOWING ARE NOT COVERED BY THE EVAPORATIVE EMISSION CONTROL SYSTEM WARRANTY:

1. Failures which may arise as a result of misuse, alterations, accidents OR non performance of routine maintenance, as specified in the Owner's Manual.
2. Replacing OR removing OR modifying any portion of the EVAPORATIVE EMISSION CONTROL SYSTEM (consisting of Fuel tank, fuel tank cap, Canister, purge valve, throttle body, vapor hoses, fuel hoses and hose connectors) with parts not certified to be genuine.

---

## EVAPORATIVE EMISSION CONTROL SYSTEM WARRANTY

---

3. Loss of time, inconvenience, loss of motorcycle use or any other consequential loss or damages.
4. Any motorcycle in which the Odometer has been tampered with, OR the Speedo cable has been disconnected for any reason OR is broken and not replaced immediately, due to which the exact distance covered cannot be determined.
5. Normal ageing of parts such as fuel hoses, vapor hoses, gaskets & rubber components.

### RECOMMENDATIONS FOR REQUIRED MAINTENANCE:

IT IS RECOMMENDED THAT THE ROUTINE MAINTENANCE OF THE MOTORCYCLE BE CARRIED OUT AT SPECIFIED INTERVALS AND ANY MAINTENANCE TO THE EVAPORATIVE EMISSION CONTROL SYSTEMS SHOULD BE PERFORMED ONLY BY AN AUTHORISED ROYAL ENFIELD SERVICE DEALER AND USING ONLY GENUINE ROYAL ENFIELD SPARE PARTS.

---

## ENVIRONMENT CARE

---

### BE AN ENVIRONMENTALLY CONSCIOUS RIDER

---

Swachh Bharat is Sachh Bharat. Being a Royal Enfield rider help the nation and the future generation for a cleaner environment.

**Engine oil, oil filter, petrol, Battery, tyres, tubes, electrical & electronic parts** replaced on your vehicle are to be disposed off in a proper way without polluting the environment. When your vehicle is attended in a Royal Enfield workshop our dealers do take care of that aspect. If you are getting it attended elsewhere please ensure that items are segregated and kept in a suitable container or bag without allowing them to get into soil, water or sewerage line, drains, water bodies like lake, canal, river, Sea etc. We strongly recommend that they are disposed off, in accordance to the applicable law, through Pollution Control Board approved agencies in the locality.

---

## ENVIRONMENT CARE

---

### CLEANING OR WASHING YOUR ROYAL ENFIELD

---

Please ensure that the effluents are not discharged into the environment. Please promote dry washing which helps the nation to conserve water too.

---

This note does not constitute legal advice; please contact your local authorities or your nearest Royal Enfield Service Centre for further guidance.

---

## SERVICE COUPONS

---

It is our endeavour to provide excellent service to your Royal Enfield Motorcycle at all times. Towards this we provide initial 4 free services & 5 paid services at specific intervals.

Please avail these services at the specified time, in any of the Royal Enfield Authorised Dealer / Service Center nearest to you and as a token of satisfactory service, kindly return the service coupons duly filled in and signed, to the service outlet.

Availing all the services in the specified time is a prerequisite to warranty consideration.

The cost of fuel, oil, oil filter element, grease and consumables used during services is chargeable to the customer.

Please ensure the details of the periodic service is filled in the manual for future reference.
